Objective

I am a motivated Full Stack Developer and UI/UX Designer with a strong interest in web development and user friendly design. I am eager to learn new technologies and apply my skills to build responsive and visual appealing websites. I enjoy working on both front-end and back-end and aim to grow as a professional by creating simple and effective digital solutions.

Skills

Programming Languages: Python, Java, C.

Web Technologies: HTML5, CSS3, JavaScript, REST APIs, Flask, React, Responsive Web Design.

Data Bases : PostgreSQL, MongoDB, MySQL.

Developer Tools : Git/GitHub, PyCharm, VS Code, Spring Tool Suite (STS).

Stack Technologies : Python Full Stack, MERN Full Stack, Ai and Machine Learning.

Soft Skills : Communication, Creativity, Leadership, Problem Solving, Time Management.

Projects

Text-to-Image Ai Generator

Github-repo

- Engineered a responsive, full-stack web application to generate AI images from text prompts using a React.js frontend and a Python (Flask) backend.
- Implemented real-time REST API integration with asynchronous data fetching, dynamic UI loading states, and comprehensive error handling.
- Tech Stack: React.js, Python, Flask, REST APIs, Frontend Development.

Start Up Success-rate Ai Predictor

Github-repo

- Developed a machine learning web application to predict startup success probability based on financial and team metrics using Python and Streamlit.
- Engineered a Random Forest predictive model using Scikit-Learn, implementing data preprocessing, interactive user inputs, and real-time risk visualization.
- Tech Stack: Python, Streamlit, Scikit-Learn, Pandas, Machine Learning.

Movie Ticket Booking Application

Project Link

- Developed an interactive front-end web application to facilitate responsive movie seat selection and streamlined ticket booking.
- Implemented real-time seat availability and pricing logic using JavaScript.
- Tech Stack: HTML, CSS, JavaScript.

Wallet Tracker Application

Project Link

- Developed a responsive personal finance web application to track daily expenses and manage financial budgets.
- Implemented the Web Storage API (local Storage) for persistent client-side data handling and seamless state management.
- Tech Stack: HTML, CSS, JavaScript.

Education

D.N.R college of engineering and technology, Bhimavaram,

2022 – 2026

- B.Tech in Artificial Intelligence & Machine Learning
- CGPA: 7.5/10 (upto 4-1 semester)

Certifications

GenAI Powered Data Analytics by TATA Forage

Building a Machine Learning Ready Organization by Amazon Web Services.

Gen AI by Linkedin Learning

Extra-Curricular Activities

- Active participant in college-level technical hackathons and coding workshops.
- Competitive Chess Player - participated in inter-college tournaments.
